

# Access VBA Programmer Services

Get control of your coding needs using our professional services. *Very affordable!*

**Full Life-Cycle \* Maintenance \* Updates**  
**Coding \* Project Management \* QA \* Testing \* Tech Writing**

## 1. New Access VBA Applications

Microsoft Access is a powerful desktop database that allows us to create a good solution for managing your data. We can build you a solution that allows you to share your database with coworkers over an intranet, and find and retrieve information quickly.

Access is a great application development tool and may be the right tool for your next project especially if you favor a Desktop Database approach. However, you need to be sure to use the right tool for the right job. There are things you should consider BEFORE choosing ANY application development tool. Call us today for a FREE consultation with Mike Prestwood to discuss your project and tool selection. Mike Prestwood is our President & CEO, and author of six programming books.

## 2. Access VBA Maintenance Coding

**From a single 4 hour task to ongoing development.**

Our position on legacy systems written in Microsoft Access is that it usually makes sense to leave it in Access especially if you prefer a Desktop Database approach or don't have the budget for a conversion to a non-desktop database approach. The problem is finding programmers that can program in that tool. Luckily, Prestwood can fulfill your legacy programming needs. We can add that needed feature or remove that annoying bug. We can even upgrade you to the latest version of Microsoft Access.

\*\*\* Available \*\*\*

**Version Control**

---

**Dev. Database**  
(Req., defect tracking, etc.)

---

**Testing**  
(QA, script DB, results, etc.)

If your business doesn't have a computer department or your computer department is over extended, Prestwood can help. Use your support account for code audits, to get developer help, complete projects and for maintenance type work.

## 3. Access VBA Conversion Projects

If you're looking to convert your existing Microsoft Access application to a leading technology, Prestwood can help.

We can convert your existing Microsoft Access application to another technology such as Borland Delphi or Visual Studio.Net (C# or VB.Net). In addition, we can convert your application into a web application or extend your Access desktop application with a website. For websites we use either ASP Classic, ASP.Net, or PHP.

As a demonstration of our skills in converting your application we invite you to view our Access VBA Conversion Guides. *These guides were developed by us (primarily by Mike Prestwood with input from our developers). We are experts in the languages we support.*

Visit [www.prestwood.com](http://www.prestwood.com) to review our 12+ Access VBA conversion guides.

## 4. Personal Developer Support

Are you an Access VBA developer? Do you sometimes want expert advice? Sometimes it's nice to have a co-developer to assign tasks to, take over development of certain areas, ask questions of and bounce ideas off of. Open a [Support Account](#) now and we'll assign a developer to work with you and you can also consult with Mike Prestwood on an as needed basis.
