

C# Programmer Services

Work with Mike Prestwood and our talented developers to complete tasks and projects.

C# coding service. Hire a C-Sharp programmer for new DotNet applications and maintenance. We are an American company that keeps jobs in America (no H-1B, nor off shoring).

Full Life-Cycle * Maintenance * Updates
Coding * Project Management * QA * Testing * Tech Writing

1. New C# Applications

Developing software requires an experienced team that understands how your business works. Prestwood Software, a leader in software development process, specializes in end-to-end software development. We use industry best practices combined with our Prestwood Software Development Process to ensure a quality work product. There is NO NEED to outsource offshore, solve your software development challenges with our services. We can turn your vision into a tangible solution.

- [PSC .Net Framework](#) - Our optional .Net Framework for building feature-rich robust n-tier database applications.

2. C# Maintenance Coding

From a single 4 hour task to ongoing development.

Find a C# programmer. If you're looking for C# programming help, consult Prestwood -- a true agency with bench C# programmers experienced in OO, UML, and process.

3. C# Conversion Projects

If you need to convert an application to C#, Prestwood can help.

If you want to convert from C#, talk to us because we would like to hear why. The only reasons we can think of are...

- your company wants to standardize on another leading language such as VB.Net, Java, Delphi, or C++.
- your company wants to move to native code application development using tools such as Delphi for Win32 and C++.
- your company wants to move to Java to take advantage of the cross-platform nature of the JVM.

If so, we can help. If you want to do something else, talk to us and let's see if Prestwood is a good fit.

As a demonstration of our skills in converting your application we invite you to view our C# Conversion Guides. *These guides were developed by us (primarily by Mike Prestwood with input from our developers). We are experts in the languages we support.*

Visit www.prestwood.com to review our 12+ C# conversion guides.

4. Personal Developer Support

Your C# co-developer!

Are you an C# developer? Do you sometimes want expert advice? Sometimes it's nice to have a co-developer to assign tasks to, take over development of certain areas, ask questions of and bounce ideas off of. Open a [Support Account](#) now and we'll assign a developer to work with you and you can also consult with Mike Prestwood on an as needed basis.
